

**Making it easier and faster  
for people to find information**

# 8 Reasons

## to get Copernic Desktop Search for you and your company

*The more information we have stored on our computers, the more time we spend on filing and finding, and the less time we spend on thinking. Copernic Desktop Search will become the key component in your daily activities to meet your ever increasing search needs. Start turning information into results and stop wasting your precious time.*

### 1 Performance

With low memory foot print and the lowest usage of computer resources, CDS is optimized to offer the best search experience. Instantly search from the deskbar or the search box for your content stored anywhere and results will appear as you are typing. Copernic Desktop Search will build an index of keywords (map of your computer) to find the relevant results quickly.

### 2 Privacy and Security

Copernic considers privacy and security as a major concern in the digital information era. CDS is built to ensure that our clients' information is secured and kept private. User-identifiable information is never sent back to Copernic or any third party.

### 3 User-friendly Experience

With the most user-friendly and powerful interface of the industry, CDS makes the search experience nice and easy. Copernic present the results into multiple categories for you to target even faster what you are actually looking for. Go even deeper with specific search criteria to refine your search.

### 4 Support Team

Exceptional Award-Winning support services for Copernic Desktop Search. Copernic Support is recognized by customers for its efficiency, timely response and accuracy. A dedicated and flexible team is there to answer any of your questions.

### 5 Strong Customization

CDS' main advantage is its ability to allow you to customize and decide how you want it to work and search your content. By accessing the options menu, you can select multiple options to customize the application from multiple mailboxes to add/remove external drives for faster and light-weight indexing.

### 6 Save Time with CDS

Copernic Desktop Search indexes on average 50% faster than all other players in the market. Meaning, you can start finding your content sooner. "Computer users can spend 20% of their work time downloading and filing information." You have probably spent hours filing and searching all your content. You can now stop and start using CDS.

### 7 Preview your Documents

You do not have to open every document before finding the one you really need. CDS will provide a peek into files, documents and even email attachments without even leaving the application.

### 8 Organization-wide Deployment

CDS can be deployed from one single point to an entire corporate network. Using Group Policy Objects (GPO), network administrators can manage CDS, publish configuration changes and updates to their users. Every corporate users will have the same settings and configurations, which makes it very easy to manage.
